Juvenile Query "Mamma," queried a six-year-old girl, "how does a dead and dumb girl say her prayers when she has a sore finger?"—New York Central Lines Magazine.

Blessing in Disguise "Most wives have a daily rush of getting the husband off to work," says the Woman's Home Companion. "They should thank God for it. They ought to be thankful they have husbands who will go off to work."

Temperature for Milk The best temperature for keeping milk is 50 degrees or less and good milk kept at this temperature will remain sweet for 12 hours at least and ordinarily 24 hours or more after it reaches the consumer. If ice cannot be obtained, an iceless refrigerator, or some such device to keep milk cool, is necessary. It is not safe to keep a temperature as low as 50 degrees. It can rarely be maintained in it.

In Memoriam In loving memory of our son and brother, Rev. Carl L. Ligon, whose noble spirit passed from earth to Heaven one year ago, May 6, 1927.

This day we would honor a memory of precious years, when he walked and talked with us. But what higher tribute could we pay to him than the place he holds in the hearts of his classmates, friends and associates. Without fear and above reproach his life was a constant challenge to come up higher—to glorify the Father in Heaven.

"Blessed are the pure in heart for they shall see God." He seemed so young to die, and yet— "We would not call him back, for he is on our track, Pierced by the thorns that we so often meet. For he is in that fairer world than ours. Where love mourns not the fading of the flower." M. C. CALDWELL and FAMILY.
